

ANTI-CELLULITE TREATMENT CELLULITE BODY MASK

Most women suffer to a greater or lesser extent from cellulite or localised fat deposits. Cellulite can appear in both obese and slim people, regardless of their weight. Everyone has a subcutaneous fat layer where cellulite is formed. The fight against this condition will be successful if it is carried out in conjunction with the beautician and the client plays their part with physical activity and a healthy diet.

USE OF TREATMENT:

This treatment is recommended for all cases of cellulite formation.

PERIOD OF TREATMENT:

2 treatments per week.

STEP BY STEP

(Length of treatment: 1 hour)

- 1 Prepare the skin with a gentle exfoliation using **Double Body Peel**. Apply the product with circular movements and remove it in the shower or with damp mittens.
- 2 After exfoliating, remove the product using a warm, wet wash mitt, or the client can take a shower.
- 3 Apply **Cellulite Control Concentrate** to the skin until it is fully absorbed.
- 4 After applying the concentrate, massage with **Anti-Cellulite Massage Cream**. Whis this masage you work intensively directly on the fatty nodules, to help to reduce them and improve their appearance.
- 5 Then apply the body wrap **Cellulite Body Mask**. Add 3 capfuls of powdered alginate to 3 capfuls of water. Stir vigorously until the mixture is smooth. Apply it quickly, covering evenly with a medium-thick layer.
- 6 After applying, cover the wrap with film and leave it on for 15-20 minutes.
- 7 Take the wrap off in one piece, quickly and cleanly. There is no need to have a shower. Finish off the treatment by applying **Slim Effect Gel** to all the areas that have been treated.

Follow-up at home:

Weekly treatment

Double Body Peel

Double exfoliating action: fossil granules and glycolic acid that eliminate the dead cells leaving the skin silky, smooth and uniform.

Perform the peeling twice a week. Apply the product onto the dry skin and massage gently. Then rinse with water.

Daily treatment

Cellulite Control

Cream gel that efficiently combats cellulitis, helps burn stored fat, improves orange-peel skin and reduces centimetres.

Apply in the problematic area morning and/or night until totally absorbed.

Daily treatment

Slim Effect Gel

Body gel that favours loss of volume and firms the tissues. The icy freshness, which its active agents provide, stimulates the cellular metabolism which helps to burn the fats stored.

Apply every day, massaging the area to be treated with rising circular movements.
