CHARCOAL MASK TREATMENT PURIFYING TREATMENT

There are always times when the skin looks dull, opaque, with a lack of brightness and smoothness. Our skin is crying out for a change of appearance in every meaning of the word. This is the time to undertake a treatment as complete as this one.

INDICATIONS OF THE TREATMENT

This treatment is suitable for all types of skin. Due to its purifying and detoxing active ingredients, this face mask is the ideal treatment for oily skins and with impurities or for all those skin types that need deep cleansing. It provides transparency and brightness to tired and devitalised skin while maintaining it free from shininess.

FREQUENCY OF TREATMENT

1 session weekly. Depending on what the skin requires the number of sessions may vary.

STEP BY STEP

(Duration of treatment: 60 min)

- 1 The first step in the treatment will be to gently remove all make-up from the lips and eyes with some cotton pads impregnated with **Bio-Douce**.
- 2 We then clean and remove the make-up from the skin with **Aqua Genomics Cleanser** spreading the product with circular movements. We then remove the product with damp gloves.
- 3 We finish the cleansing with **Aqua Genomics Toner** applying it with some cotton pads.
- 4 We undertake the exfoliation with **Profesional Glycolic Kit**. We take 5 ml of **Liquid Stage** with the measuring syringe and place it in the **Powder Stage** jar, mixing it with the spatula. We apply the mixture with a fan brush and after 10 minutes remove the product with a generous amount of water.
- 5 We immediately do a face massage with **Vitalizing Massage Cream**. Using a brush we apply a layer of cream as if it were a face mask and then do the corresponding manoeuvres. Finally, we remove the cream with a towel dampened in hot water.
- 6 Without remains of cream on the skin we apply the **Concentrated Facial Moisturiser** until it is completely absorbed.
- 7 We then apply the **Charcoal Mask**, spreading a not very thin layer of the mask with a brush, respecting the contour of the eyes and lips. We leave it to work for 10 minutes.
- 8 To remove the mask gently and easily dampen it slightly and remove with gloves or damp sponges. It is important to rinse several times so that the skin is left perfectly clean.
- 9 We complete the cleansing of the skin by passing some cotton pads with **Aqua Genomics Toner**. We dry the skin with a tissue.
- 10 To end the treatment we apply **Peptide Eye Contour Gel-Cream** on the contour of the eyes and **Protective Cream SPF 25** on the face, neck and chest.

BRUNOVASSARI
