

BRUNO VASSARI LAB DIVISION

EXFOLIATING REVITALIZING TREATMENT

GLYCO SYSTEM

The different situations that we go through during our life; the hormonal changes, the stress situations, and the environment we live in.... can cause changes to our skin.

When the skin begins to look dull, choke, thick.... Is the perfect moment to renew it to obtain a more vital and bright skin.

USE OF TREATMENT:

Suitable for young and mature skin who need a shock treatment to renew the skin.

FREQUENCY OF TREATMENT:

Make 2 or 1 weekly sessions, depending on the skin needs.

STEP BY STEP

(Length of the treatment: 60min)

- 1 Cleanse the skin by moistening some cotton wool with **Bio-Douce** and removing the product from the eyes and lips.
- 2 Then, for a complete cleansing of the skin, apply **Aqua Genomics Cleanser** with circular movements over the face, neck and décolleté. Rinse the product with moistened mitten.
- 3 Next, tone the skin using **Aqua Genomics Toner**, applied with moistened cotton wools.
- 4 With clean skin, start the **Professional Glycolic Kit + Vitamin C**. Introduce the measurement syringe in the **Liquid Phase** and fill it with 5ml of product. Introduce the liquid in the **Powder Phase** product. Mix it with the spatula and apply the mixture with a fan brush, leaving the peeling act for 10 minutes. After it, rinse the product with enough water.
- 5 Next, to activate blood circulation, oxygenate the skin and assist its regeneration, we recommend a good facial massage with **Vitalizing Massage Cream**. After the massage, remove the remains of the cream with a hot, damp towel. This massage is optional.
- 6 Once the skin is clean again, apply the facial concentrate **Moisturizing** and spread it over the skin until it has been fully absorbed.
- 7 Prepare the **Firming Modeling Mask**, mixing the content of the sachet with the enough amount of water to obtain a homogeneous mixture, apply over face, neck and décolleté. Leave it act for 15-20 minutes.
- 8 Apply **Peptide Eye Gel- Cream** over the eye area.
- 9 To end the treatment we apply the **Protective Cream SPF25** on face, neck and décolleté.

BRUNOVASSARI

Ongoing Home Care:

Clean

Glyco Washing Foam

Cleansing foam formulated with glycolic acid, which helps the cell renewal, improves the skin texture and prepares it for the following treatments

Pump two doses on the hands and extend with circular movements over the face, neck and décollete. Rinse with enough water.
Apply: morning and evening

Tonify

Dual - Phase Toner

Glycolic toner that prepares the skin for the next treatment.

Shake the product until both phases are even. Apply over face, neck and décolleté with cotton pads.
Apply: morning and evening

Day Treatment

Protective Cream SPF 25

Fast-absorbing day cream that nourishes the skin and restores its moisture. Contains UV filters and Vitamin E, which protect skin against signs of aging caused by UVA and UVB exposure.

Apply every morning after the cleansing of the skin.
Apply: morning

Night Treatment

Serum Intensive Glyco-C

Anti-ageing and lightening serum. Contains Vitamin C that evens and illuminates the skin tone.

Mix both phases and apply with clean skin.
Apply: evening

Eye Treatment

Peptide Eye Contour Gel-Cream

Eye contour gel-cream that activates the synthesis of collagen. Anti age activity.

Apply on the eye contour.
Apply: morning and evening
