

MOISTURISING TREATMENT

There are many factors that influence the level of dehydration of the skin, such as age, diet, the environment to which the skin is exposed, the weather and the care given to the skin.

To relief this problem, we carry out a treatment with vitamins, oligoelements and plant extracts to strengthen the hydrolipidic barrier. Two masks are used to enhance the absorption of the active ingredients.

USE OF THE TREATMENT:

This treatment is suitable for skin with dehydration problems. After the treatment, the skin will have greater elasticity and hydration.

FREQUENCY OF TREATMENT:

Once a month.

STEP BY STEP

(Length of treatment: 45-50 minutes)

- 1 First remove the make-up with **Aqua Cleanser**, using circular movements to emulsify the make-up and the skin's impurities. Remove with sponges or gloves moistened in water. The cleansing milk is formulated with plant extracts.
- 2 Next soak some cotton pads with **Aqua Toner** to remove any product residue. The plant extracts stimulate and balance the skin.
- 3 Exfoliate with **Frappé di Vite** to remove any dead skin cells and help the penetration of the active ingredients of the treatment. Apply it using circular movements for three minutes. Remove with moist gloves.
- 4 Massage the face for 10-15 minutes with **Vitalizing Massage Cream**. After finishing the massage, remove any leftover product.
- 5 Apply **Moisturizing Concentrate**. Absorption can be enhanced either by using stimulating movements, or by ionizing from the negative pole.
- 6 Apply the moisturising and relaxing **Hydro-Intensive Mask** for 8 minutes to enhance the penetration of the concentrate while restoring and moisturising. Remove the mask with moist sponges or gloves.
- 7 Again, apply some cotton wool soaked in **Aqua Toner**.
- 8 With the skin clean and dry, conclude the treatment by applying **Anti-stress Daily Cream** Cream to the treated area and **Eye Gel-Cream** to the eye contour.

Ongoing care at home: Moisturising

Cleanse

Aqua Milk

Gentle cleansing cream that soothes and moisturises the skin.

Apply product to face, neck and décolleté. Rinse off with plenty of water or remove with cotton wool.

Use: morning-night

Tone

Aqua Toner

Gentle toner that moisturises and normalises the skin after cleansing.

Apply product on cotton wool to face, neck and décolleté. It will help to remove the cleanser and leaves skin clean of any products or natural oils.

Use: morning-night

Treatment for Eyes

Eye Gel Cream

Anti-wrinkles and anti-ageing action.

Apply to eye contour. To treat the wrinkles, apply the product in the opposite direction to the wrinkle to enhance penetration.

Use: morning-night

Day-time treatment

Anti-stress Daily Cream

Moisturising cream rich in vitamins and oligoelements.

Apply to clean skin after the usual skincare regime to face, neck and décolleté.

Night-time treatment

Gentle Night Cream

Nutritive and firming overnight cream.

Apply on the skin after cleansing and massage until fully absorbed.

Weekly treatment

Frappé di Vite

Peeling that gently removes dead skin cells.

This gentle exfoliant can be used weekly to improve the skin's texture and appearance.
