VISIBLE RESULTS

The cells of the skin tissue, as well as the rest of the body cells, slow up their regeneration rhythm when we grow old. The ageing of the skin main cause is cells and tissue oxidation, which up to a 90% is due to the solar light daily exposure. This oxidation process damages the cell's internal elements, speeding up its deterioration and slowing its renewal power.

USE OF TREATMENT:
Suitable for skins with ageing signs in face, eyes and eye contour and specially recommended as a treatment to prevent the appearance of expression lines.

TREATMENT FREQUENCY:
Once a week for a shock therapy, until the desired results are obtained. To maintain the results, carry out the treatment 3 times every 6 months.
