

OILY CONTROL TREATMENT

Oily skin is one of the most common problems and one of those which results in the most consultations with the beauticians. This problem is due to an increase in the activity of the sebaceous gland, which produces excess sebum. The excess oil causes the appearance of skin blemishes and bothersome shiny skin.

USE OF TREATMENT:

Suitable to treat skin that is oily and/or has blemishes. Controls shine and improves the texture of the skin.

FREQUENCY OF TREATMENT:

At the outset, the treatment is recommended until the desired results are obtained. Perform the treatment once a week for maintenance. For very oily skin, the treatment can be carried out twice weekly.

STEP BY STEP

(Length of treatment: 50 minutes)

- 1 Start the treatment by removing any make-up from eyes and lips with some cotton wool moistened in the specific make-up remover **Bio-Douce**. This product removes even the hardest to remove make-up.
- 2 To remove make-up from the face, neck and neckline, use **Cleansing Gel**. Dab gently on the area and moisten your fingertips to emulsify the product. Remove with gloves moistened in water.
- 3 With clean skin, continue the treatment by toning using cotton wool soaked in **Balancing Toner**, which is specifically for treating oily skin. The salicylic acid contained in the toner helps to enhance the appearance of skin, removing shine and closing open pores. For any skin blemishes, apply the toner **Akno-Control Lotion**.
- 4 Next, carry out a deep exfoliation using **Peel Treatment** (specifically for greasy skin). Using a measuring syringe, extract 5 ml of product and apply to the area to be treated with a fan brush. To enhance the result, gently massage the areas that require a more in-depth exfoliation. Leave to work for 20 minutes.
- 5 After that time, deep-clean the skin to completely remove any product residue.
- 6 After exfoliating, apply the concentrate **Oily Control Concentrate** using gentle movements to promote lymphatic drainage until fully absorbed.
- 7 Following the application of the concentrate, prepare the seaweed **Oily Control Mask**. To do this, mix a sachet of the mask with 100 ml of cold water and mix vigorously to obtain a smooth mixture. As soon as it is ready, smear over the face and neck. The mask can be used on the eyes and mouth without any protection. Leave to work for 15-20 minutes.
- 8 In the eye area, rub on **Eye Contour Gel** using gentle circular movements.
- 9 To complete the treatment, apply **Balance Fluid** to face and neck and gently rub until it is fully absorbed. The light fluid will keep skin moisturised and shine-free.

Ongoing care at home: Oily Control Treatment

Cleanse	Cleansing Gel Purifying gel cleanser that deeply cleans skin, leaving a pleasant feeling of freshness. Apply with gentle movements to the area. Moisten your fingertips to emulsify the product, and rinse off with plenty of water. Use: morning-night
Tone	Balancing Toner Refreshing toner that refines skin texture, tightens pores and offers a great feeling of comfort. Suitable for greasy skin. Apply product on cotton wool to face, neck and neckline. It helps remove the cleanser and leaves the skin free of any product or natural oils. Use: morning-night
	Akno Control Lotion Helps to prevent blackheads and blemishes. Removes shine caused by excess oil, leaving skin clean and fresh. Recommended for very greasy skin and acne. Dab product on cotton wool to face, neck and neckline. It helps remove the cleanser and leaves the skin free of any product or natural oils. Use: morning-night
Day-time treatment	Balance Fluid Non-greasy moisturising fluid that eliminates shine caused by excess oil, leaving skin soft and matt. Recommended for greasy skin or skin with blemishes. Apply in the morning and/or at night after cleansing and toning skin.
	Oil free Moisturizing Gel Non-greasy moisturising fluid that eliminates shine caused by excess oil, leaving skin soft and matt. Recommended for greasy skin or skin with blemishes. Apply in the morning and/or at night after usual cleansing.
Treatment for Eyes	Eye Contour Gel Cream Eye cream with a gel texture that restores elasticity and skin moisture. Apply morning and night, gently rubbing in. Use: morning-night
Local treatment	Corrective Cream Local treatment cream. Regulates sebum production, removes shine and has an antiseptic effect. Apply at night only to areas with blemishes.
